SUMMARY

I possess a wealth of knowledge and compassion for the care of childbearing women, newborns, their families, and adolescent health.

My reputation as an exceptional mentor extends both within and beyond my workplace. Over a span of more than four years, I have dedicated myself to guiding numerous students, nurses, and fellow midwives in nurturing their growth and development in the field.

Apart from my role as a midwife, I am a newborn focal person and actively volunteer as a facilitator, an advocate for maternal, newborn and adolescent health and actively engage in various committees within the department to promote the advancement of midwifery. I frequently participate in community health outreaches alongside providing vital services.

The dedication to continuous learning is evident as I regularly participate in health conferences, both local and international trainings, and webinars. Additionally, I play a pivotal role as a key member of a committed group of midwives who have formed a training team within the Maternity Unit.
